Area

Tables can be moved
into any position, for a
particular operation.

NOTES:

- * The Easy Fill operates by air. Suggest a coiled hose and overhead drop for air line. We can supply the coiled hose, fittings and air line. You can run air hose from the compressor above the ceiling or exposed. This allows you to move configuration of tables around in the area to suit your needs.
- * Suggest placing a standard circulating fan overhead, to direct air over the drying trays.
- * Electrical Outlets: We suggest an outlet every 8' of wall.
