Note:

* I got to thinking that you might want to look outside while packaging and then realized that where we originally thought the tanks should go, would be far away from the oil storage. Not much room in the Kitchen for that.

* I added a couple more SS work tables. Did not put in proposal yet.

* If you want any tables cut down, be sure to let me know. They are 36" high to start.

* Elec. Requirements.

* Lye Tank is 1500 watt, 120 v

* Oil Heater is 3000 watt, 220 v, 6/30 plug

* Did not add to the proposal a Manual Cutter Hoist System at this time. Please let me know if you want to add.
